I have developed lots of web applications for 2 years. I always try to choose the best language and technology for what I do, usually these days "Vue.js" one of my preferences. It is also a joy for me to read and search new and best technologies for my job. Teaching and googling is one of my hobbies. I live in Aydın/Turkey and I was born in 1992.

Education

Computer Programming

Pamukkale University 2010 – 2012

Business Administration

Anadolu University 2012 - 2017

Reward

Uğur Motorlu Araçlar

Uma Sap (2019)

Experience

"Source codes of my projects are accessible on [gitlab](https://gitlab.com/ITOLDYOU)."

Full Stack Developer - 07/2018 – Today
Aydın/Turkey, Uğur Motorlu Araçlar

I develop workflows on the company's own website (intranet). I am also developing software in the SAP/Abap system.

- **CRM System**

- A project that handles the customer 360 degrees, especially demand and survey.
- Backend, Frontend, SAP integration (RFC) the whole structure was developed by me.
 - Nodejs (Express, Sequelize), JavaScript (Vue.js), SPA

- **Logistics Tracking System**

- Reportable tracking system that calculates the distance between cities via Google Maps. The whole structure was developed by me.
 - Firebase, JavaScript (Vue.js), SPA

- **Authorized Services Inspection System**

- A system developed to control authorized services. The whole structure was developed by me.
 - Sharepoint, JavaScript, SQL, RFC

Other Projects

- This website, citizens can calculate their true inflation based on their spending distribution. The whole structure was developed by me. [Seninenfkasyonunkac.com](https://seninenfkasyonunkac.com)
 - Google Sheet API, JavaScript (Vue.js), Vuetify, ChartJS
- I have developed this game only for hobby. [Matchpokemon](https://matchpokemon.com)
 - JavaScript (Vue.js) , Firebase

Helpdesk 09/2012 - 09/2017
Aydin/Turkey, Genç Data IT
